How to install The GT Scalper Indicator

1. Open your MetaTrader 4 application, click File – Open Data Folder.
2. Open the “MQL4” folder within the MT4 directory.
3. Find the “Indicators” subfolder and open it.
4. Copy the downloaded GT Scalper Indicator files into the “Indicators” folder.
5. Find the “Templates” subfolder and open it.
6. Copy the downloaded GT Scalper Indicator files into the “Templates” folder.
7. In MT4, navigate to the “Navigator” window on the left side of the interface.
8. Right click anywhere inside the “Navigator” window and click “Refresh”.
9. Expand the “Indicators” section.
10. Find the GT Scalper Indicator in the list, then drag and drop it onto your desired chart.
11. Adjust the settings in the indicator’s properties window if desired (the default settings are optimized for immediate use).
12. Click “OK” to apply the Indicator to your chart.
